

May newsletter

Hello,

You are receiving this email as a part of the Yale Psychology Diversity Committee's Undergraduate Outreach Mailing List. Many lab manager and research assistant positions in psychology are advertised by word of mouth, obtained through networking, or influenced by the institution an applicant attended. This structure of employment advertising is inherently biased and puts historically underrepresented minorities and students at non-research focused institutions at a distinct disadvantage. It is our hope that, by sharing this resource, we will be able to advertise opportunities for full-time research positions or paid research experiences that would otherwise not be publicized to students at these institutions.

Our emails will be sent once a month. We will only send opportunities that are paid (full time or summer positions), offer course credit, or provide services to students (e.g., Diversity Visiting Days). If you have an opportunity to share, please [fill out this short form](#).

As a recipient of this listserv, we ask that you share this and future emails with undergraduates or recent graduates interested in psychology at your institution.

Please provide an alternative contact if there is someone more appropriate to receive these emails at your institution. Faculty, administrative staff, or individual students may sign up to join the mailing list [here](#).

We also share paid research opportunities and positions on our Twitter page, @YalePsychDEI.

Best,
Ming Ma and Eva Liu
On behalf of Yale Psychology Committee on Diversity and Inclusion

----- FULL-TIME POSITIONS -----

1. Junior Specialist, The Yu Emotion Science Lab, University of California, Santa Barbara

Deadline: June 30, 2023

Link: <https://recruit.ap.ucsb.edu/JPF02483>

The Yu Emotion Science (YES) Lab at University of California, Santa Barbara, directed by Dr. Hongbo Yu, is seeking applications for an open, full-time position for a Junior Specialist. Participate fully in social psychology and cognitive neuroscience research. Responsibilities will include: assisting with study design and stimulus construction, assisting with recruiting and training undergraduate student RAs, scheduling, pre-screening, and testing participants for behavioral and neuroimaging studies, data management, statistical analysis, assisting the PI and research team with presentations at lab meetings and at psychology and neuroscience conferences, and authorship on academic research articles. Additional duties will include: contributing to administrative tasks of the lab, such as managing IRB protocols and reviews, and ordering, and maintaining lab supplies to assure all research projects are executed properly. Candidates must be able to work both independently and in collaboration with others, have strong multi-tasking, problem-solving, interpersonal, and organizational skills.

2. Research Assistant, VA Boston Healthcare System

Deadline: May 31, 2023

Link: <https://www.bu.edu/ballab/ResearchAssistant.html>

The [Boston Attention and Learning Lab](#) at VA Boston Healthcare System/Harvard Medical School/Boston University Chobanian & Avedisian School of Medicine is looking for a full-time Research Assistant to characterize the cognitive and neural mechanisms underlying trauma-related conditions in Post-9/11 Veterans. This position will entail being an integral team member in a large, comprehensive longitudinal project. This position will be in-person, based at VA Boston Healthcare System in Jamaica Plain. This research assistant will participate in all aspects of research including data collection, analysis, coding, writing, presenting, and publishing findings. The position will provide an excellent opportunity for training in the fields of cognitive neuroscience, clinical psychology, and neuropsychology, and will uniquely prepare the individual for clinical, cognitive, or neuroscience graduate school programs.

3. Research Assistant, The Morality Lab, Boston College

Deadline: Until filled

Link: <https://my.spsp.org/Career-Center/Job-Search/JBctl/ViewJob/JobID/3475/ zs/Xf2Nc/ zl/jhjX3>

The Morality Lab at Boston College, led by Liane Young, is seeking up to two full-time postbaccalaureate research assistants, with a two-year commitment. Applications will be reviewed on a rolling basis until the position has been filled, with the position starting as early as April 2023 and no later than July 2023. Responsibilities include handling administrative duties for the lab (e.g., managing finances, purchasing equipment, maintaining lab software and lab data, preparing grant applications, coordinating meetings, obtaining human subjects approval, recruiting and scheduling subjects), supporting the research of graduate students and postdocs (e.g., mentoring research assistants, maintaining lab software, assisting in data collection and analysis), and conducting original research. All former postbac research assistants have had the opportunity to design, conduct, publish, and present research. This position is ideal for individuals interested in applying to graduate school.

4. Research Assistant, Glynn Research Lab, Chapman University

Deadline: Until filled

Link: <https://chapman.peopleadmin.com/postings/30854>

The Glynn Research Lab is hiring a full-time (renewable) research assistant. The research assistant, under general supervision of the principal investigator (PI), Dr. Laura Glynn, and lab manager, will support laboratory investigations in the PI's research in psychology and health-sciences. This position presents diverse opportunities to participate in work on NIH and CA state-funded research on early-life experiences, brain development, and markers of risk and resilience to mental illnesses during childhood and adolescence. The research assistant will have the opportunity to work with several cohorts and will be responsible for recruiting, consenting, and testing mothers, infants, school-age children, adolescents, and young adults. Assessments include standardized interviews and developmental assessments, collecting infant saliva samples at Orange County CHOC clinics and participant homes, behavioral observation, field studies of mood via smart phone technology, and attending participant MRI sessions. Other responsibilities include overseeing IRB protocols, attending lab meetings, and assisting the PIs with data analysis.

5. Research Technician, Northeastern University

Deadline: Until filled

Link: https://northeastern.wd1.myworkdayjobs.com/en-US/careers/job/Boston-MA-Main-Campus/Sr-Research-Technician_R113095-1

Aaron Seitz and Susanne Jaeggi in the Center for Cognitive and Brain Health seek a Senior Research Technician to assist in overseeing the lab's operations. Our studies are focused on measuring and training cognitive processes and we work with diverse populations, including ages (ranging from children to older adults), neurodiverse individuals and those with perceptual and cognitive needs, thus, candidates should be sensitive to the needs of different people, also including people of different backgrounds (i.e.,

race, culture, gender, socioeconomic status, etc). Additionally, an ideal candidate should have strong interpersonal, communication, and project management skills, who can work well in both remote and in-person settings with PIs, graduate students, undergraduate students, programmers, designers, community partners, and national/international collaborators. Experiences in team management and staff supervision are a plus.

6. Lab Manager, Bilingual Learning Lab, Boston University

Deadline: Until filled

Link: N/A

Boston University's [Bilingual Learning Lab](#) directed by Dr. Kimberly Crespo is seeking a full-time lab manager. Our research focuses on understanding how individual differences in bilingual experience, language ability and cognition interact to shape language learning and development in children with and without language disorders. The candidate will be responsible for: managing participant recruitment; organizing outreach to the local community; interacting with children, families, and schools; coordinating lab calendars and scheduling; testing research participants and collecting data; entering and coding data; training and supervising undergraduate research assistants; assisting with programming research experiments; purchasing and upkeep of equipment and supplies; and submitting and renewing IRB protocols. There may be opportunities for presenting data at conferences and co-authoring publications. To apply, please email your application to Dr. Crespo (kcrespo@bu.edu). Application materials should include: cover letter detailing qualifications and interest, CV/Resume, Unofficial Transcript with GPA, Names and emails of two references who can provide letters upon request.

7. Project Coordinator, New York University

Deadline: Until filled

Link: <https://apply.interfolio.com/124261>

The Play & Learning Across a Year (PLAY) Project, funded by NIH and directed by Principal Investigators Karen Adolph and Catherine Tamis-LeMonda at New York University and Rick Gilmore at Penn State University, invites applications for a 1-2 year Project Coordinator position beginning in Summer 2023. The Project Coordinator will work with the PIs and Science Director to help manage the project. Research responsibilities include: management of tablet-based questionnaires; coding of video data in Datavyu; quality assurance; maintaining databases of data tracking and sharing in Databrary; literature searches; and co-authoring manuscripts and presentations. Administrative duties include: purchasing and shipping research materials; maintaining records of sites and staff; support on IRB protocols; coordinating project events and meetings; assisting in expense and grant management; communicating with university staff and administration; and general support for the PIs and Science Director. Salary is commensurate with experience. Minimum one-year commitment required with the potential for renewal pending satisfactory performance and budgetary approval.

8. Research Technician, Social Perception lab, Tulane University

Deadline: Until filled

Link: <https://jobs.tulane.edu/position/IRC26441>

The Social Perception Lab, directed by Dr. Laurie O'Brien, is seeking a Laboratory Research Technician who will contribute to multiple aspects of research projects examining prejudice, discrimination, and intergroup relations. The Laboratory Research Technician will work as part of a team comprised of graduate students and undergraduate research assistants and will coordinate day-to-day operations of the lab. Major responsibilities will include working with the lab director to develop stimulus materials for studies, collect and analyze human subjects data, and administrative duties. Other tasks will be commensurate with the experience and interests of the technician. The position requires excellent

communication and organizational skills, a high degree of independence, meticulous work practices, and a demonstrated interest in social psychology.

9. Lab Manager, Developing Equitable Minds Lab and Developing Minds Online, University of Illinois, Urbana-Champaign

Deadline: Until filled

Link: N/A

Prof. Michael T. Rizzo, Director of the Developing Equitable Minds Lab (DEML) and Developing Minds Online (DMO) at the University of Illinois, Urbana-Champaign is hiring a Lab Manager (40 hr/wk). The position entails coordinating research projects for the [Developing Equitable Minds Lab](#) and aiding in the creation of the Developing Minds Online platform – an online platform for conducting unmoderated, remote research with children ([Rhodes, Rizzo, et al., 2020](#)). This position is ideal for anyone looking to gain research experience, mentorship, and training in social or social-cognitive development, as well as anyone interested in leveraging cutting-edge methods for online research in developmental science. Responsibilities include research activities (developing and conducting studies with children and families), online lab development (feedback and testing of DMO...), team management, lab administration, and community outreach and recruitment related roles. BA or BS in Psychology, CS, or related field, at least 1 year of research experience in developmental, social, or cognitive psychology, and ability to solve problems proactively, work independently, and lead/support/train undergraduate research assistants are required. Please send a single document that includes your (1) cover letter, (2) CV, and (3) list of at least 3 professional references to mtrizzo@illinois.edu. The cover letter should specify your research experience, interests, and career goals. Emails and phone numbers should be provided for all references. Note that all of your application materials must be combined into a single pdf or Word document.

10. Research Specialist, Decision Neuroscience and Psychopathology, University of Pittsburgh

Deadline: Until filled

Link: N/A

The Decision Neuroscience and Psychopathology Lab seeks to hire several full-time Research Specialists. The candidate will work on several NIH-supported studies of learning and decision-making processes in personality disorders, depression, anxiety and suicide. Research Specialists assist with the implementation and administration of our protocols. Core responsibilities include, but are not limited to data collection, data management, participant recruitment and retention, and lab administration. Opportunities to contribute to reinforcement learning modeling and analysis of behavioral and neuroimaging data are also available, contingent upon the applicant's interest. Prior experience in these latter areas, while advantageous, is not required (we provide the necessary training). Given the extensive training required, a 2- or 3-year commitment is preferred. To apply, please submit a CV, cover letter that describes research interests, and a list of three references to Amy Lu (luq2@upmc.edu<<mailto:luq2@upmc.edu>>). Review of applications will begin immediately and will continue until the positions have been filled. We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law. Please visit the lab website at www.dnpl.pitt.edu for additional information.

11. Research Specialist, Computational Cognitive Science Lab, Princeton University

Deadline: Until filled

Link: <https://research-princeton.icims.com/jobs/16842/research-specialist-i/job?mobile=false&width=1050&height=500&bqa=true&needsRedirect=false&jan1offset=-300&jun1offset=-240>

The Department of Psychology is looking for a Research Specialist to manage the laboratories of Professors Tania Lombrozo and Tom Griffiths. The successful applicant will handle lab administration and data management for the labs as well as interact with students (both graduate and undergraduate), postdoctoral fellows and other individuals who are part of the lab. Aspects of lab administration that the individual will be responsible for include but are not limited to organizing/scheduling lab meetings and lab events, overseeing research assistant training, creating and maintaining paper and electronic record-keeping systems, adhering to and monitoring adherence to human subject protocols, ordering and organizing lab supplies, managing reimbursements, managing subject payments, maintaining lab networks and printers, creating and maintaining lab web sites, and updating lab documents and file systems. This is a one-year appointment with the possibility of renewal based on funding and satisfactory performance. The target start date will be August 14, 2023, but there is some flexibility. This position is subject to the University's background check policy.

12. Research Assistant, Department of Psychology, UC Riverside

Deadline: Until filled

Link: bit.ly/dzlabmgr

Dr. Halle Dimsdale-Zucker is seeking one full-time 100% appointment Lab Assistant to begin in Summer 2023. The duration for the position is one year with the opportunity for renewal based on funding, department needs, and performance. Her laboratory studies human memory and uses neuropsychological, cognitive, physiological, and neuroimaging data in younger and healthy older adults. The Lab Assistant will be involved in multiple aspects of work in the lab including participant recruitment and screening, data collection, programming behavioral tasks, maintenance and analysis of behavioral and neuroimaging data, authoring posters for presentation, and authoring manuscripts for publication. The Lab Assistant will also have administrative duties, including coordinating team meetings, managing teams of research assistants, assisting with IRB and other documents, and maintaining study databases and lab documentation. The position is ideal for motivated individuals interested in pursuing an advanced degree in cognitive neuroscience or related fields. The expected pay range for this position is between \$39,191.76 - \$42,094.08.

13. Research Assistant, Gaab Lab, Harvard University/Harvard Graduate School of Education

Deadline: Until filled

Link:

<https://sjobs.brassring.com/TGnewUI/Search/home/HomeWithPreLoad?partnerid=25240&siteid=5341&PageType=JobDetails&jobid=1989957>

Research in the Gaab Lab (www.gaablab.com) focuses on typical and atypical learning trajectories from infancy to adulthood with a special focus on language and reading development and the role of the environment in shaping these trajectories. The lab specializes in developmental cognitive neuroscience within a preventive education and learning disability framework. We are seeking a full-time Research Assistant to support our team at the Harvard Graduate School of Education. Please also send a copy of the application to gaablab@gse.harvard.edu.

14. Lab Manager, Play and Learning Lab, Cornell University

Deadline: Until filled

Link: https://cornell.wd1.myworkdayjobs.com/CornellCareerPage/job/Ithaca-Main-Campus/Lab-Manager--Play-and-Learning--PAL--Lab_WDR-00036550-1

The Cornell Play and Learning Laboratory are primarily interested in the development of language acquisition and spatial cognition. The lab works with children between 6 months and 7 years old. Using methods such as visual habituation, cognitive-motor assessments, play-based tasks, and eye-tracking

technology, the lab investigates the physical and cognitive mechanisms that children employ as they acquire linguistic, spatial, and functional abilities. The Lab Manager will support the Play and Learning (PAL) Lab under the direction of Marianella Casasola. The research team in the PAL Lab examines the development of spatial and language skills from infancy into early childhood. More information can be found on the job application link provided above. This is a full-time 1-year appointment with possible extension contingent on successful performance and continuation of funding.

15. Lab Manager, The Cognitive & Developmental Neuroscience Lab, University of Massachusetts Amherst

Deadline: Until filled

Link: <https://careers.massachusetts.edu/cw/en-us/job/518488?ApplicationSubSourceID=>

The Cognitive & Developmental Neuroscience Lab (<http://www.codeneuro.net>; PI: Joon Park) at the University of Massachusetts Amherst is seeking a lab manager who will assist with an NSF-funded project on numerical cognition. Responsibilities include recruiting and running child and adult participants on campus and at various off-campus venues, using behavioral and neural methods. Duties also include maintaining lab equipment, managing administrative paperwork, and training and overseeing undergraduate research assistants. This position is ideal for those looking to pursue a PhD in cognitive or developmental psychology, or related field. Start date is flexible within summer 2023. For questions, please contact Dr. Joonkoo Park (joonkoo@umass.edu).

16. Lab Manager, UC DREAMS Lab, University of California, Berkeley

Deadline: Until filled

Link: <https://aprecruit.berkeley.edu/JPF03917>

The UC UC DREAMS Lab is focused on understanding the nature of prejudice, bias, and inequality development across numerous social groups, such as Black Americans, Native Americans, Asian Americans, women, and poor individuals. The lab applies methods from social, cultural, and developmental psychology to understand how features of our social and cultural context shape peoples' attitudes and behaviors in ways that work to reify existing inequalities and stagnate change. Responsibilities include many research-related activities, such as: Recruit and schedule participants for single session or multi-session studies; Interact with research participants; Obtain consent, explain project goals and provide overview of procedures; Designing and creating experimental stimuli; Preparation of research for publication; Recruiting, training, and supervising undergraduate assistants; Preparing applications for human subjects approval; Coordinating lab member scheduling and meetings; Helping to handle research expenses (i.e., helping coordinate payment for study stimuli, participants, and research dissemination).

17. Lab Manager, Chatter Lab, University of Chicago

Deadline: Until filled (review of applications will begin May 1, 2023)

Link: https://docs.google.com/document/d/1AZxkQaq-5_pa_KK1VIJjAMtgJWh78Sapmp0f64Dzn6M/edit

The University of Chicago Chatter Lab (<https://chatterlab.uchicago.edu/>) seeks a technically skilled and enthusiastic lab manager to help conduct research on language processing and language learning in natural conversational contexts. Our lab conducts observational and experiment-based studies of language behavior in adults and children across multiple cultural and linguistic settings.

18. Lab Manager, Georgetown Early Learning Project, Georgetown University

Deadline: Until filled

Link: https://georgetown.wd1.myworkdayjobs.com/en-US/Georgetown_Admin_Careers/details/Lab-Manager-Research-Assistant-2---Georgetown-University-College-of-Arts-and-Sciences_JR15410-1

The Lab Manager/Research Assistant 2 is engaged in recruiting and testing participants for a grant funded study looking at learning in monolingual and bilingual young children. They will be trained to run eye tracking and memory flexibility studies, to collect data in the field, and to work on the collaborative PLAY study. Once trained, they collect data alongside undergraduates, graduate and other research personnel to visit families to collect, collate and code data in a timely manner.

19. Research Assistant, The Brain Development Lab, Vanderbilt University

Deadline: May 15, 2023

Link: <https://ecsr.fa.us2.oraclecloud.com/hcmUI/CandidateExperience/en/sites/CX/job/10003747>

We are broadly interested in how the brain changes over development and in individual differences (including disability) in cortical organization (<https://lab.vanderbilt.edu/boothlab/>). This position involves participant recruitment and outreach, administering cognitive testing, collecting neuroimaging data, data management and analysis, supervising undergraduate assistants, various administrative duties and assisting with reports. The position reports to the Laboratory Director.

20. Project Coordinator, The Naturalistic Observation of Social Interaction Lab, University of Arizona

Deadline: Until filled

Link: https://my.spsp.org/Career-Center/Job-Search/JBctl/ViewJob/JobID/3484/_zs/Xf2Nc/_zl/ehjX3

The Naturalistic Observation of Social Interaction (NOSI) Lab at the University of Arizona is looking for a full-time Project Coordinator for a combined mobile sensing and gaming study, with the goal of studying human decision making (and predictors thereof) in the context of human-autonomy collaboration. The Project Coordinator will be housed in the NOSI Lab and will work closely with Matthias Mehl (UA Psychology), Evan Carter (Principal Investigator; Army Research Labs), Andrew Campbell (Dartmouth College, Computer Science), and Lidia Tapia (University of New Mexico, Computer Science) as well as an interdisciplinary team of scientists.

21. Research Technician, The Early NeuroCognitive Development Team, SUNY at Binghamton

Deadline: Until filled

Link:

<https://rfbu.interviewexchange.com/jobofferdetails.jsp;jsessionid=3F606F1E60310EE6503E509585BC7B2D?JOBID=161368>

The Early NeuroCognitive Development (ENCoDe) Team is seeking a full time Research Technician (Team Manager). The ENCoDe Team is conducting research on the development of functional and structural neural changes involved in face processing and other perceptual and cognitive domains (e.g., attention, language). The majority of the projects will involve infant participants but there will be opportunities to conduct research with young adult groups. Research activities will include experiment design and data collection via EEG and MRI acquisitions. Additionally, the candidate will assist in setting up and managing the recruitment and appointment scheduling for the team, along with overseeing the daily activities of the ENCoDe and shared lab spaces dedicated to running research studies. The position would be ideal for candidates on the path to graduate school with strong interests in the developmental cognitive neuroscience field.

This is a full-time term position for two years from date of hire with the possibility of renewal contingent on performance and funding each 12 months. Flexible start-date between July 3rd and August 14th 2023. Review of applications will begin immediately and continue on a rolling basis until the position is filled.

22. Research Specialist, University of South California

Deadline: June 5, 2023

Link: <https://uscjobs.sc.edu/postings/143595>

This position aims to support an NIH-funded project investigating the role of friends in the development of adolescents who have experienced abuse and neglect. The hired candidate will assist PI by providing hands-on support with participant recruitment and scheduling, data collection, communications, and the project's overall implementation. Such support will also include developing protocols, managing and training volunteers in data collection and analysis, managing project resources, monitoring compliance with human health and safety protocols, and assisting with dissemination efforts—other duties as assigned.

23. Lab Manager, Cognitive Tools Lab, Stanford University

Deadline: May 17, 2023

Link: <https://cogtoolslab.github.io/prospective.html>

Under the supervision of Dr. Fan, the Lab Manager will be closely involved in many different research activities, including: designing & conducting online behavioral experiments, analyzing the resulting data, presenting findings at international conferences & writing manuscripts for publication. This position will also include administrative duties, such as onboarding new lab members, managing lab cyberinfrastructure, assisting with grants administration, maintaining the lab website, as well as organizing lab social events. The ideal candidate will be able to work on-site at Stanford University.

24. Lab Manager, The Social Learning and Decisions Lab, University of Maryland

Deadline: Until filled

Link: https://0a0cbbc8-5344-4a31-8fcf-ca6ece9ae741.filesusr.com/ugd/f8c03d_2316b1007af0451f94005d51ef067a6b.pdf

The Social Learning and Decisions Lab (PI: Caroline Charpentier) at the University of Maryland, College Park, is seeking applications for a full-time lab manager/research assistant (formal title: Faculty Specialist) to start September 2023. Current research in the lab focuses on uncovering the behavioral and neural computations involved in human social and affective decision-making, with a strong interest in how individual variability in these processes relate to neurodiversity and psychopathology. This is an excellent opportunity to gain research experience in preparation for a graduate career, and to be a crucial part of the set-up of a new lab.

25. Project Assistant, Keck School of Medicine, University of Southern California

Deadline: May 31, 2023

Link: <https://usccareers.usc.edu/job/alhambra/project-assistant/1209/47618398272>

The Department of Family Medicine at USC Keck School of Medicine invites applications for a highly motivated full-time Project Assistant under the supervision of Dr. Duke Han. The primary purpose of this position will be to pursue and support clinical research initiatives related to cognition, decision making, and neuroimaging in older adult and other populations under the direction of Dr. Han. The Project Assistant will have a primary role of participant recruitment and retention, data collection and data management, and other research-related activities in support of ongoing studies. Exceptional

organizational, interpersonal, communication, and writing skills are necessary. Computer programming, statistical skills, and previous clinical research experience are a plus. This full-time position is ideal for candidates looking to spend a year doing clinical research before medical school or an advanced graduate degree. Please submit a cover letter, CV, and contact information for three references.
